

During Stevia Convention 2014, Dr Marylin Vian, from GREEN Extraction Group, Avignon, France, will present Innovative Processes for Stevia Glycosides Extraction & Separation.

As not only the cultivation methods are important, Dr Vian will highlight the importance to select an adequate method to extract, characterize and purify Stevia.

Her presentation will be divided in three parts:

1. *Conventional & Non-Conventional Methods: Ultrasounds , Microwaves, Supercritical Fluids,...*
2. *Innovative Method for Stevia glycosides Separation and Quantification : HP-TLC*
3. *Presentation of Laboratory & Pilot Equipments*
